PRIYANKA JAIN

Forward Deployed Engineer | Technical Solutions Delivery | Enterprise Blockchain & Identity Systems

Gurgaon, Haryana 122505 | +91 7417227754 | jainprank@gmail.com

linkedin.com/in/jainprank | Portfolio: jainpriyanka.vercel.app

PROFESSIONAL SUMMARY

Technical product and delivery leader with 9+ years bridging engineering and business across blockchain, distributed-ledger, and enterprise identity systems. Builds hands-on: independently designed and built a proof-of-concept decentralized identity wallet spanning backend, frontend, data, and infrastructure (Java 21/Spring Boot, React/TypeScript, PostgreSQL, Kubernetes, GitHub Actions CI/CD). At The Hashgraph Group, translates client and market requirements into functional specifications and delivery plans for a portfolio of 7 Hedera-based enterprise products spanning tokenized identity, digital-asset custody, and asset issuance — embedding directly with engineering teams and external clients to take products from architecture through go-to-market. Led product for Flowgenix-AI, a 9-agent GenAI system that cut carbon-credit methodology processing from 4–5 months to 1–2 days. Certified Scrum Product Owner; AWS Cloud Practitioner; Corda Developer Certificate.

TECHNICAL SKILLS

Languages & Frameworks: Java 21, Spring Boot, TypeScript, JavaScript, React

Data & Persistence: PostgreSQL, JSON (Jackson)

Infrastructure & DevOps: Kubernetes, GitHub Actions (CI/CD)

Identity & Verification: ZXing (QR-based identity verification)

Blockchain / DLT: Hedera Hashgraph, Corda (Corda Developer Certificate), tokenization & smart-contract solution design

GenAI Systems (product lead): Multi-agent GenAI pipelines, orchestrator design with human-in-the-loop checkpoints, document parsing (Docling), chunking/embedding, BPMN/DMN generation

Cloud: AWS (Cloud Practitioner)

AI-Assisted Delivery Tooling: Claude, GitHub Copilot, Cursor, Atlassian Intelligence

SELECTED TECHNICAL PROJECTS

Decentralized Identity Wallet — Proof of Concept

- Independently designed and built an end-to-end decentralized identity wallet: a Java 21/Spring Boot backend exposing JSON APIs via Jackson, a React/TypeScript frontend, and PostgreSQL for identity and credential persistence.
- Implemented QR-based identity verification using ZXing.
- Containerized the application and deployed it on Kubernetes; built a CI/CD pipeline with GitHub Actions (.github/workflows/ci.yml) to automate build, test, and deployment.

Flowgenix-AI — Multi-Agent GenAI System (The Hashgraph Group, for EcoGuard)

- Led product for a 9-agent GenAI system that digitizes carbon-credit methodology documents into executable workflows, cutting an industry SME's processing time from 4–5 months to 1–2 days (~98% faster) and accelerating carbon-market onboarding.
- Orchestrator-driven, two-phase pipeline with human-in-the-loop checkpoints: a document-parsing phase (Docling-based parsing, chunking/embedding, structured model of processes, eligibility rules, and formulas) feeding specialist generator agents that produce BPMN workflows, form schemas, validation rules, lookups, a calculation engine, and DMN decision tables.

PROFESSIONAL EXPERIENCE

The Hashgraph Group — Gurgaon, India (Swiss-headquartered)

Lead Product Owner *Dec 2025 – Present*

- Own the roadmap and technical requirement definition for a portfolio of 7 Hedera-based enterprise products (H4E suite) spanning asset tokenization, digital-asset custody, decentralized identity, ESG/carbon markets, and tokenized loyalty — translating client and market needs into functional specs for engineering teams.
- Embedded directly with client, registry, and internal marketing stakeholders to take TrackTrace (supply-chain traceability platform) and EcoGuard (carbon-market tokenization on Hedera) from architecture through go-to-market.
- Lead and mentor a team of product owners across Asseto (tokenized securities), AssetGuard (digital-asset custody wallet), IDTrust (decentralized identity for humans, machines, and AI agents), BrandBoost (tokenized loyalty), and SEALCOIN (IoT payments), aligning delivery standards across squads.

- Serve as the primary technical liaison between engineering, design, and executive stakeholders, converting market requirements into acceptance criteria and delivery plans.

Accenture Technology — Gurgaon, India

Project Manager *Nov 2023 – Dec 2025*

- Managed delivery of NTT Digital's Universal Infrastructure Wallet (UWI), a tokenized digital-identity platform, coordinating engineering, UX, and QA against client and business requirements.
- Integrated GenAI tooling (Accenture myWizard) into the delivery workflow to auto-generate user stories and test cases, reducing manual effort and accelerating schedule.
- Used GenAI dashboard analytics to flag delivery risk and capacity gaps early, supporting data-driven engineering decisions.

Functional Lead & Scrum Master *Aug 2022 – Nov 2023*

- Led delivery of high-impact, multi-stakeholder programs across 12+ clients, including Microsoft's Azure Supply Chain blockchain initiative, which cut supply-chain costs by $50M.
- Designed scalable delivery models — data-flow diagrams, process maps, technical mockups — cutting downstream engineering rework.
- Directed 30+ member cross-functional Agile engineering teams; drove RFP responses and technical solution pitches with effort estimation.

Agile Scrum Master *Nov 2019 – Aug 2022*

- Facilitated the full Scrum framework for 40+ globally distributed engineers across multiple blockchain projects; partnered with product owners to prioritize backlog items by technical and business value.

Business Analyst *Jul 2017 – Oct 2019*

- Delivered blockchain solutioning for leading clients including Petronas, Google, Kuehne+Nagel, AB InBev, Walmart, NTT, and GJEPC; ran 20+ design-thinking workshops and gap analyses between current- and target-state systems.

CERTIFICATIONS

- Certified Scrum Product Owner (CSPO)
- Corda Developer Certificate
- AWS Cloud Practitioner
- LIT – Global People Leadership (Accenture internal leadership program)

AWARDS & RECOGNITION

- Gartner Power of the Profession Award — Microsoft Azure Supply Chain
- ACE (Accenture Celebrates Excellence) Awards — Shipping & 5G projects
- People's Choice Award for Innovation — Organ Donation Tracking
- Co-Innovation & Client Innovation Awards — Petronas, Oil & Gas sector
- Global Innovation Contest — 2nd Place, 'Zero Data Breach' use case

EDUCATION

M.Tech, Chemical Engineering — Indian Institute of Technology (IIT), Roorkee *2015 – 2017*

Grade: 8.9. Publications in Bioresource Technology: "Pretreated algal bloom as a nutrient source for biodiesel"; "Augmented lipid accumulation in oleaginous microalgae."

B.Tech, Chemical Engineering — SDMCET *2010 – 2014*

Grade: 9.1.
